## ABOUT US

We are one of the most important producers of certified reflectors in Europe. Since 2008, we have constantly been expanding and developing our range to become a leading manufacturer and supplier of certified reflectors on a European scale.

We are constantly improving our quality of service and keeping up with the latest fashion trends as well as market demand. As a manufacturer, we approach every task flexibly and enthusiastically, and our graphic designers can convince everyone that every logo can be turned into a reflector.

Our Polish factory and print shop produce reflectors according to individual orders and customer requirements. Therefore, with us the customer can choose the size, shape, color, print, quantity, and reflective accessories to obtain a satisfactory target product that meets your expectations and budget. Especially for the convenience of our B2B customers, we have created a B2B configurator, thanks to which they can easily customize our products to their needs.

**Communication in 4 languages: English, French, German, Polish:**

Thanks to our language skills, we minimize the sense of risk during the order process and its execution.

**Full personalization of production and packaging from just 100 units:**

Quick production time of 7-21 days. Guidance from salesperson from start to finish. Our graphic design department will bring your idea to paper, after which production will prepare the finished product. Our production lines are located exclusively in Poland, which is why we can 100% guarantee the European origin of our products with the appropriate EU Certificate of Origin issued by Refloactive.

**Punctuality:**

We guarantee adherence to the deadline provided at the time of order placement.

2

## CERTIFICATES

**WHY CERTIFIED REFLECTORS?**

The main difference between a reflective gadget and a certified reflector is the distance from which they reflect headlights. Non-certified reflectors only reflect light from a distance of about 30 meters. In comparison – certified reflectors reflect light from up to 300 m!

**GOOD TO KNOW:**

As of 2021, the latest standard for certified reflectors - EN 17353 - is in effect. It significantly increases the requirement for the quality of the reflective film used and specifies a minimum re-

flective area. In order to be certified as meeting EN 17353, one must be tested by an accredited body, which checks the reflectivity from different angles. Properties such as durability and abrasion resistance are also tested.

In parts of the European Union, the use of non-certified reflectors does not legally protect an accident victim, and any medical and compensation costs are also borne by the entity that sold the non-certified reflector. The requirements apply to both specialized accessories and advertising gadgets that have reflective elements.

**IMPORTANT!**

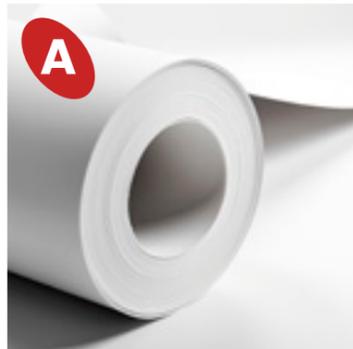

We have no doubts about the certification and the origin of the raw materials. We buy them directly from reputable manufacturers, not intermediaries - especially since it is a product as sensitive as a reflector - personal protective equipment.

3

## MATERIALS WE WORK WITH

Each of our reflectors is made from raw materials selected by us. These raw materials are of the highest quality so that our reflectors are solidly made and have a careful finish.

### FOLPRINT WHITE BACKING PVC FILM

It is used for the production of all of our reflectors as a bright background for solvent sub-printing and scratch protection. The film is rigid and durable. Folprint film is REACH-certified – it informs that the raw material is produced in the EU and that no heavy metals or hazardous substances are found in the composition.

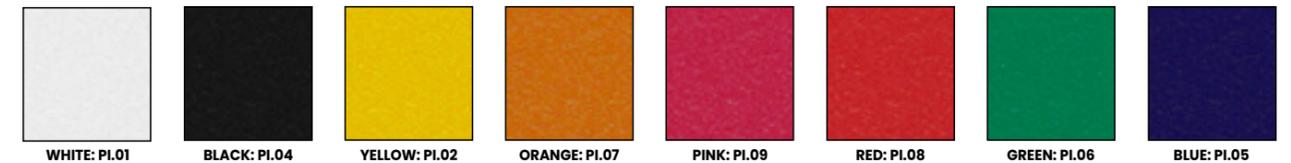

## FOAMS FILLERS

WHITE AND COLORED

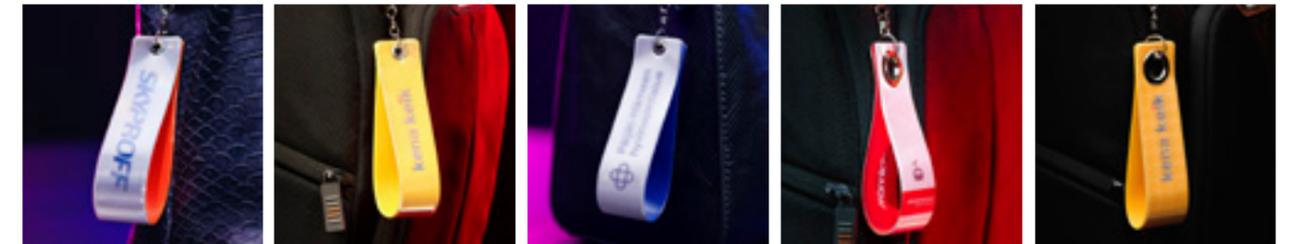

GREEN: PI.01    YELLOW: PI.08    WHITE: PI.05    YELLOW: PI.02    BLUE: PI.06    RED: PI.04

### AVAILABLE COLORS:

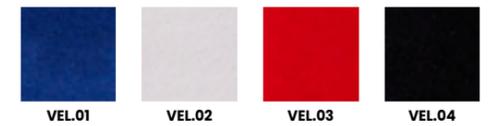

WHITE: PI.01    BLACK: PI.04    YELLOW: PI.02    ORANGE: PI.07    PINK: PI.09    RED: PI.08    GREEN: PI.06    BLUE: PI.05

### ORDINARY FLOCK

Similar to Italian flock, this material is used for the production of wristbands and key rings. Plain flock has 4 colors: black, gray, red, and navy blue.

### AVAILABLE COLORS:

VEL.01    VEL.02    VEL.03    VEL.04

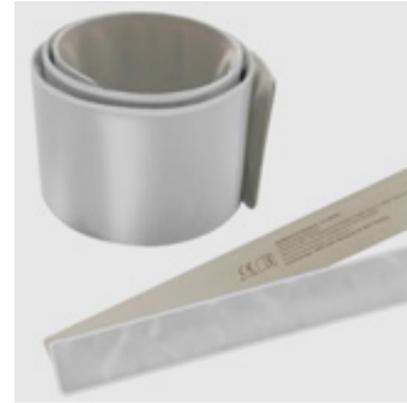

## VELOUR / ITALIAN FLEECE

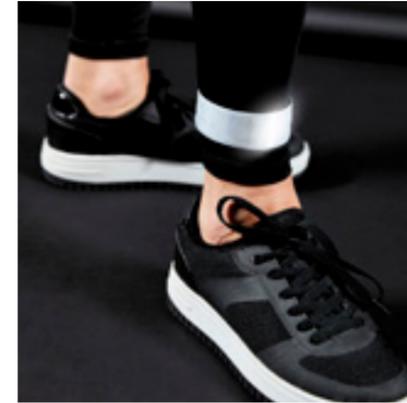

This is a gray material used in manufacturing for wristbands and key rings or magnet clips as their outer layer. Italian flock is REACH-certified – it informs that the raw material is produced in the EU and that no heavy metals or hazardous substances are found in the composition.

**AVAILABLE COLORS:**

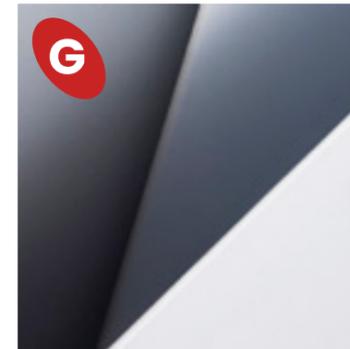

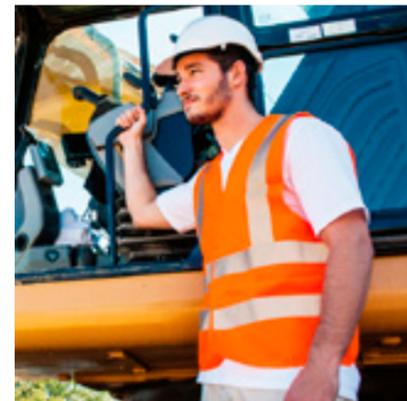

## STEEL METAL PLATE

Our wristbands are filled with the metal self-locking part. Thanks to that, the band worn on the wrist wraps around it without causing discomfort.

## SILVER REFLECTIVE POLYESTER FABRIC TXR

This material is used to make reflective textile buttons. It is also used to make reflective stripes on vests.

## DS PLATE

This is a rigid PVC plate used to make reflective bicycle spoke reflectors, which are attached to the spokes of the bicycle. The plate ensures stability of such reflectors.

## TYPES OF REFLECTIVE FILMS

Offered products can be made from several available films depending on demand, reflective properties, and thus also in certification.

We use 4 basic types of reflective film from the following suppliers to produce our reflectors. Let's see which reflective material meets the requirements of European standards and check the number of the standard:

### REFLECTIVE MATERIALS

BRAND NAME	COLOR, WATERMARK ON FILM	ACCORDANCE TO EUROPEAN REQUIREMENT	GOOD TO KNOW
ENFREN ReflomaX		EN 17353	PVC FREE, PHTHALATES FREE
AGR MAX ReflomaX		EN 17353	PHTHALATES FREE
ORAFOL		EN 17353	PHTHALATES FREE
ReflomaX		promotional quality REACH conformity	PHTHALATES FREE
STANDARD		✗	✗

ReflomaX Only One & Better

ENFREN

## RF-ENF 01 – TPU REFLECTIVE FILM, PVC-FREE (REFLOMAX – SOUTH KOREA)

The film as a raw material meets the requirements of standard EN 17353:2020, colors to choose from: silver

### GOOD TO KNOW:

As an eco-friendly alternative to traditional PVC-based products, reflective items made from TPU film are now available. These items offer the same light reflection properties as conventional products. All products made with TPU film meet the latest standard for personal protective equipment, EN 17353, making them suitable for everyday use. The products reflect light up to 300 meters, providing an additional layer of safety. The advantage of TPU is that it is odorless. Additionally, the production of PVC generates significantly more environmentally harmful side effects.

ReflomaX Only One & Better

AGR MAX GLODIAN™ AGR™

## RF-AGR 001/002 REFLECTIVE FILM (REFLOMAX – SOUTH KOREA)

The film as a raw material meets the requirements of standard EN 17353:2020, colors to choose from: silver or yellow.

### GOOD TO KNOW:

Reflectors made of AGR MAX silver foil, with enough reflective surface (depends on reflector Type nr 1, 2 or 3), is designed to meet requirements of EN 17353:2020 standard as a finished product, which we as a manufacturer can confirm by the Declaration of Conformity. These products are conform to PPE (EU) Regulation 2016/425 and can be marked as CE products based on EN 17353:2020 conformity. EN 17353:2020 requirements are more stringent than those of standard EN 13356, and the range of tests and their tests are significantly expanded.

## RF-ORA 001/002 REFLECTIVE FILM (ORAFOL – GERMANY)

Reflectors made of ORALITE reflective film with enough reflective surface (depends on reflector Type nr 1, 2 or 3) are designed to meet requirements of EN17353:2020 standard as a finished product, which we as a manufacturer can confirm by the Declaration of Conformity Colors to choose from: silver, yellow.

### GOOD TO KNOW:

Ready products made of ORALITE reflective film are conform to PPE (EU) Regulation 2016/425 and can be marked as CE products based on EN 17353:2020 conformity. EN 17353:2020 requirements are more stringent than those of standard EN 13356, and the range of tests and their tests are significantly expanded.

## RF-RGR 01/02/04/07/08/11/13 REFLECTIVE FILM (REFLOMAX – SOUTH KOREA)

The film is available in many colors such as: silver, yellow, green, blue, red, orange, and pink. RGR film tested for freedom from heavy metals and plasticizers. Ideal for making gadgets with prints that are not safety products. The foil does not comply with the reflective standard EN13356 – also the silver and yellow ones. This means that the concentration of the reflective prisms on 1 cm<sup>2</sup> is not sufficient to meet the certification standards. However the manufactured snap bands with a large surface comply with EN13356, where soft hangers are not due to their small area.

### GOOD TO KNOW:

The yellow and silver RGR film is indistinguishable from the certified AGR film on the eye – it looks the same and has the same holograms. Unfortunately, the quality of the two slides is completely different and the light reflection of RGR gadgets is much lower than that of AGR, so they do not fulfil any protective functions. Therefore, the offer of some producers of reflective REFLOMAX films does not mean that certified films are used for production, on the contrary, the price of the product shows that they offer a cheaper, non-certified replacement.

## RF-S: (NO CERTIFICATION)

**COLORS 024 YELLOW AND 001 SILVER  
ARE CERTIFIED WITH EN 13356  
ONLY FOR SLAP BANDS IN SIZE 34 X 3 CM**

## STANDARD FOIL

Standard reflective film is a good option for producing promotional items that do not need to meet the requirements for personal protective equipment in road traffic. Reflective gadgets also reflect light to some extent, but to a lesser degree than certified films. The advantages include a low price and a wide range of colors to choose from. Remember the rule that the lighter the film, the better it reflects light.

## RF-S: NO CERTIFICATION, AVAILABLE COLORS

## TECHNICAL INFORMATION

Each of our reflectors is made from raw materials selected by us. These raw materials are of the highest quality so that our reflectors are solidly made and have a careful finish.

### WHITE PVC FILM

for printing directly under the reflective film

Print effect: A reflective film is applied to the full-surface, multi-colored print. The print shines through and the surface remains 100% reflective.

### INNER MATERIAL

WHITE AND COLORED

PVC foam filling, 1.2 mm thick, REACH-compliant, manufactured in the EU. Available in the colors listed below. By using a colored foam filling, other colors than just white can also be used for the white reflective foil.

## SOFT REFLECTORS FOR DAILY USE

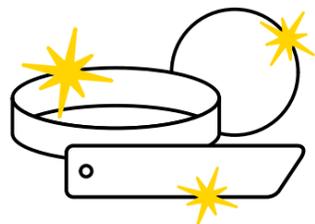

We create our products in Poland, taking care to always obtain the highest materials from our partners throughout Europe. We are 100% independent and carry out production from the design phase to printing, production, packaging, and shipping.

### READY-MADE PRODUCTION MOULDS

Our production capabilities allow us to offer products in many different shapes. We provide our business clients a catalog of several hundred free ready-made production moulds.

On request, we can create an individual design for each of our products while maintaining the safety qualities in accordance with EU certificates. Importantly, individual shape production extends production by only about 5 working days.

#### HOW TO PLACE AN ORDER?

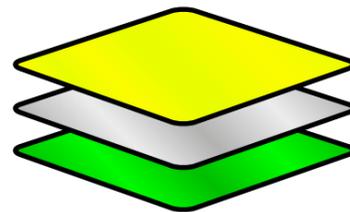

1

Select the type of reflector

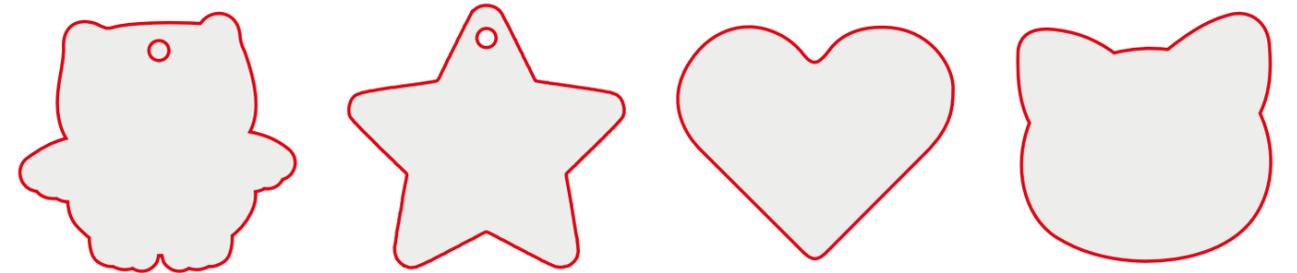

2

Decide on its shape based on the free available production moulds or create your own individual design

3

Select type of reflective film: AGR, AGR MAX, Orallite, 3M Scotchlite, RGR

Several hundred free readymade production moulds

Individual shape production extends production by only about 5 working days

### REFLECTIVE PRODUCTS

Our production capabilities allow us to offer products in many different shapes. We provide our business clients a catalog of several hundred free ready-made production moulds.

On request, we can create an individual design for each of our products while maintaining the safety qualities in accordance with EU certificates. Importantly, individual shape production extends production by only about 5 working days.

- Products made **in Poland**.
- **Great possibilities of personalizing** the shape - create a product in your own shape.
- The minimum order quantity is **100 pieces**.
- **Delivery in Europe** is via UPS Standard / Express, DPD, Raben.
- Delivery time is approx. **7-15 working days**.
- For each product, we can provide **customized single packaging** according to your individual project.
- The production range can be made from the **various films available**.

The type of selected film, the circulation, the size of the target product and the type of printing affect the price of the final product, do not forget to provide the merchant with these parameters when sending a quote request. The quotation process will run more smoothly, and you will be able to present your customer with a multi-variant offer.

4

send your inquiry or fix the order

**For any new idea or request pls contact our sales team first, we will guide you !**

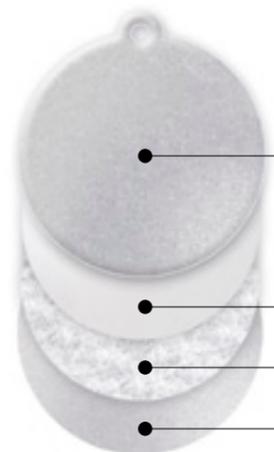

## REFLECTIVE SOFT HANGERS

Reflective tags (hangers) are attached to clothing, backpacks, bags and are excellent protection for pedestrians in traffic. A pedestrian moving in the dark sets the reflective pendant in motion, and it reflects the lights of car headlights increasing the alertness of the driver. We offer many dimensions of pendants, and the possibility of marking, fastening, or individual packaging with the customer's mark.

Check out the printing, mounting and packaging options in the technical section of the pages: 14-22

STANDARD FOIL

REFLECTIVE CERTIFIED FOIL  
(AGR, AGR MAX, ORALITE, 3M)

PVC WHITE FOLPRINT

FILLING FOAM

REFLECTIVE CERTIFIED FOIL  
(AGR, AGR MAX, ORALITE, 3M)

### Printing method:

- **Printing on reflective foil:** 1-3 colors (silk-screen printing) or CMYK (digital printing) – the place of printing covers the reflector's surface
- **Printing under the reflective film:** on white Folprint CMYK (digital printing) – 100% retained reflective surface

**Print area: limited only by the surface of the soft hanger**

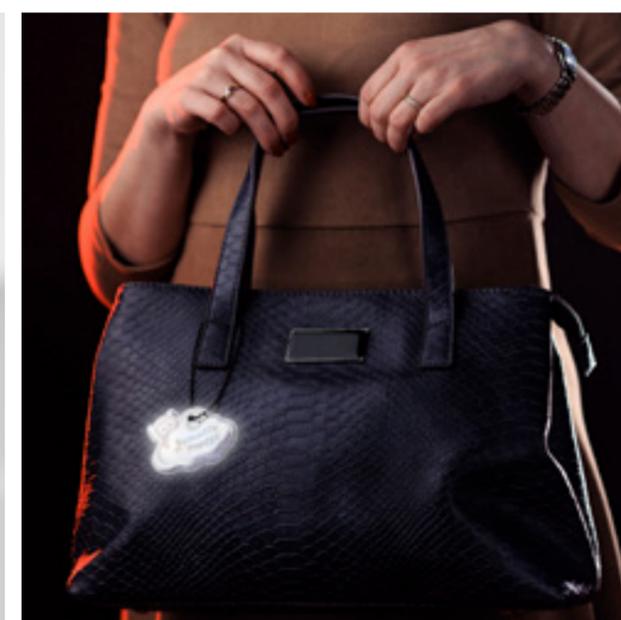

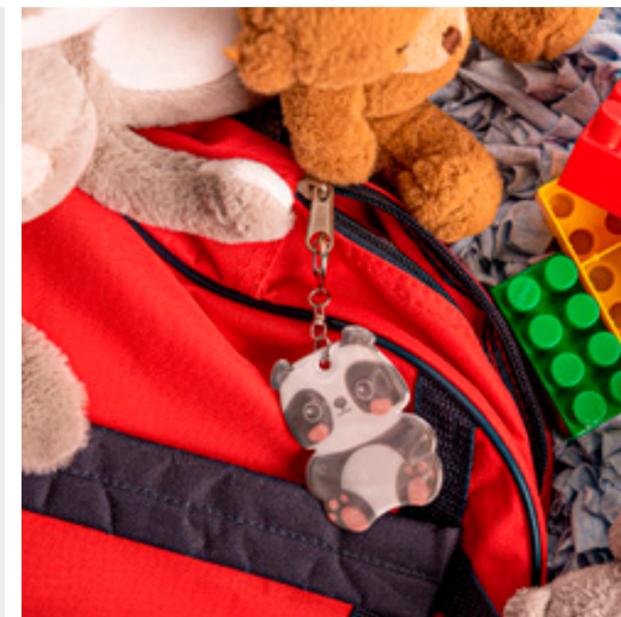

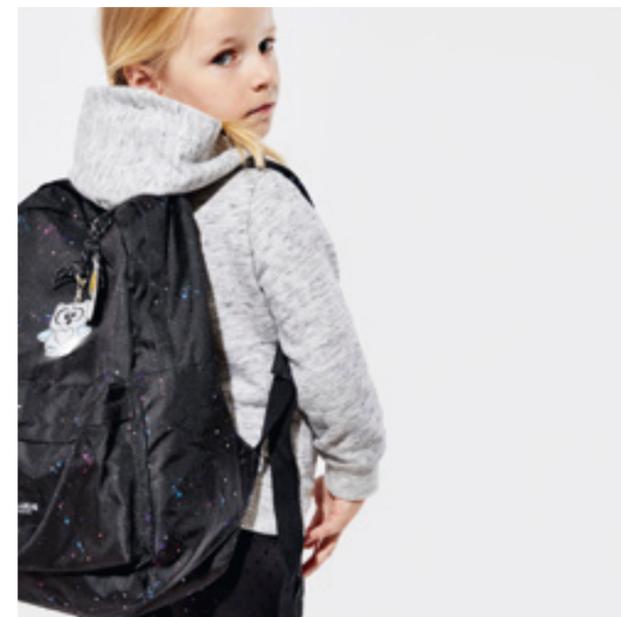

CE CE Conformity product with EU Regulation 2016/425 – PPE products.

This is the most popular reflective protective gadget in the advertising industry, it can be made practically from start to finish according to the customer's individual design. It is also a universal product, intended for any user, regardless of gender, age and industry represented. Each customer can use one of our hundreds of production matrices or order his own unique shape of the reflective key ring, characteristic only for the selected customer.

### Please note

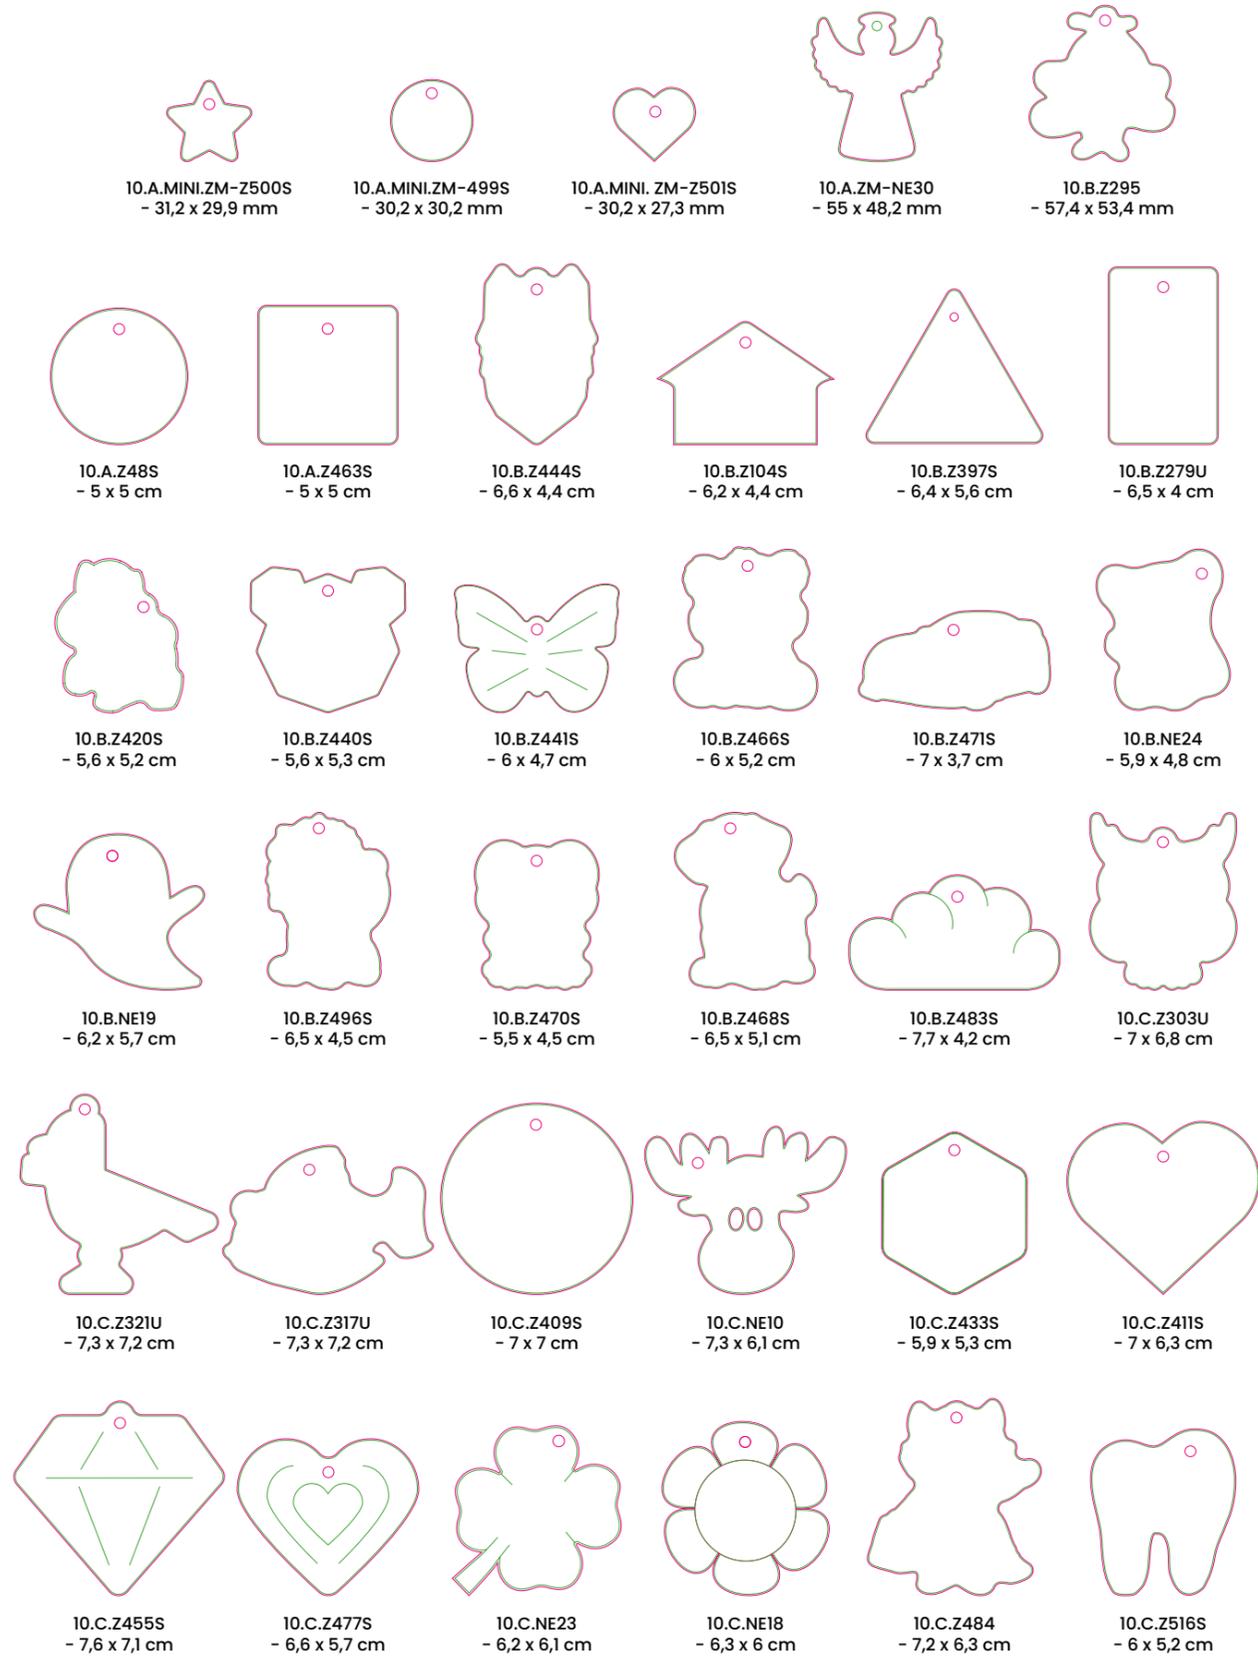

We recommend under printing or small print on the pendant. To meet the standards of the requirements of EU Regulation 2016/425, it is necessary to leave min. 30cm<sup>2</sup> of unprinted reflective surface counting 2 sides of the pendant together. Printing under the reflective film does not cover the reflector. If the marking is on the reflective film, choose a correspondingly larger size of the pendant.

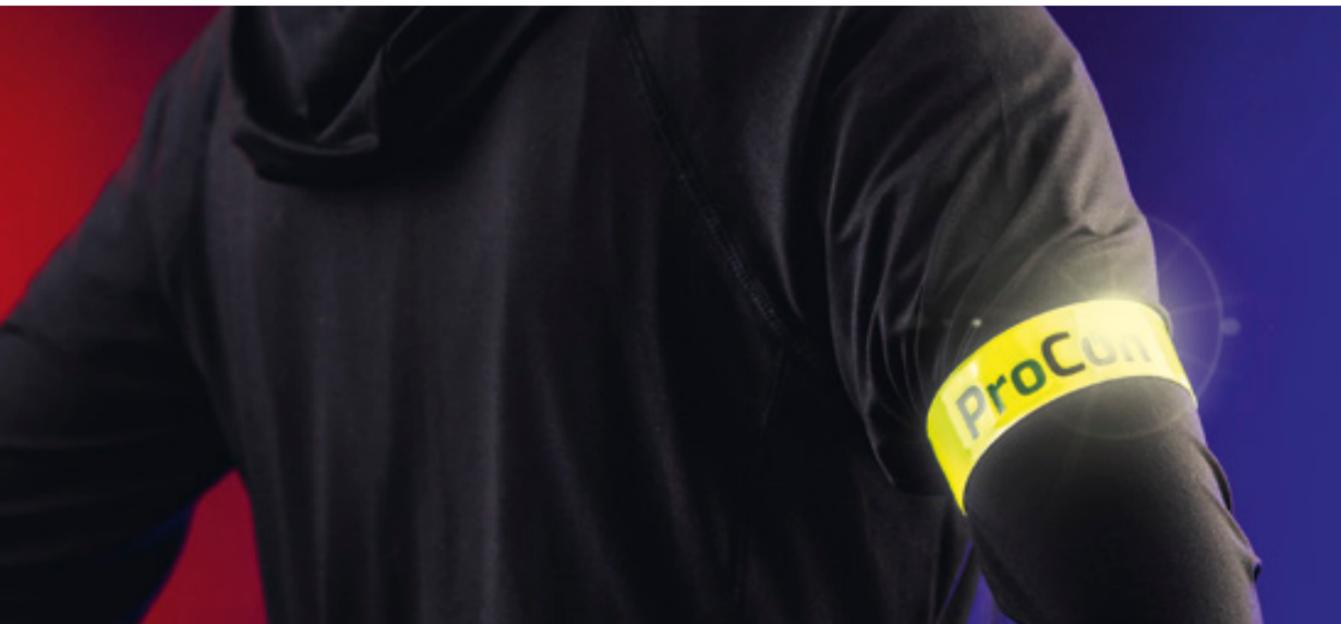

# Be visible Be safe

# Soft hangers

– standard shapes

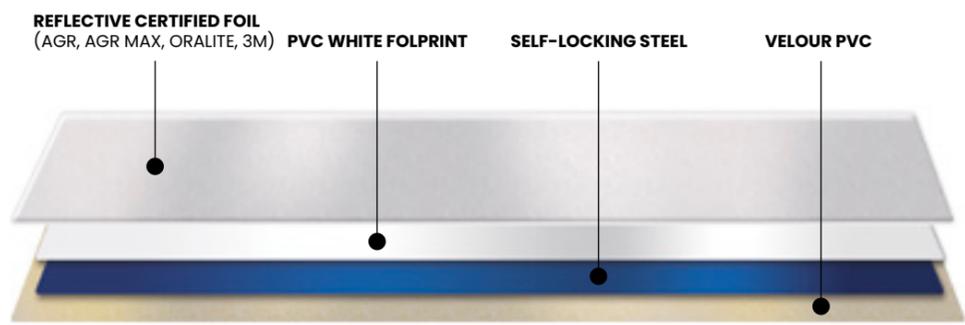

## REFLECTIVE SNAP BANDS

The reflective snap band is the ideal product for evening walks. When darkness falls, the reflective snap band will make the pedestrian visible to drivers. Reflective slap bands can be worn on wrists or ankles. According to the latest EN17353:2020 standard, 2 reflective armbands must be worn at the time for the product to meet the requirements of EU Regulation 2016/425 - Protective Equipment Products.

Check out the printing, mounting and packaging options in the technical section of the pages: 14-22

**Printing method:**

- **Printing on reflective foil:** 1-3 colors (silk-screen printing) or CMYK (digital printing) – the place of printing covers the reflector's surface
- **Printing under the reflective film:** on white Folprint CMYK (digital printing) – 100% retained reflective surface
- **Printing method on flocking** (certificate number, instruction of use) – screen printing 1 color

**Print area: limited only by the surface of the product**

CE CE Conformity product with EU Regulation 2016/425 – PPE products.

The product is perfect for pedestrians, runners, cyclists, and children – certified reflective rye film for production will ensure the safety of the user in traffic.

## PERSONALIZATION:

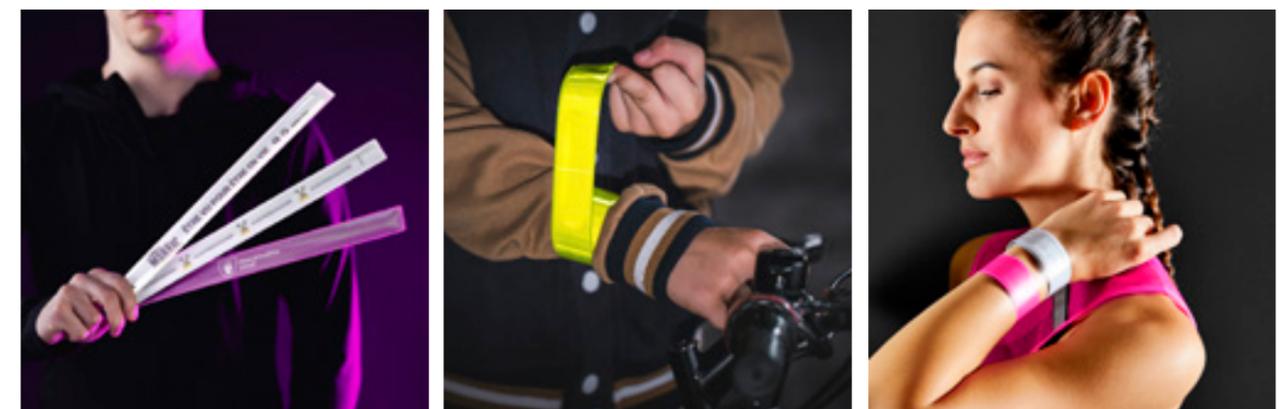

1. you can choose one of the ready-made shapes we offer free of charge and adapt it to your requirements. We can print these on 1 or 2 sides on or under the reflective foil.
2. you send us a customer logo in high resolution and we will create a customized tag shape for you to view free of charge. We also simulate the print application.

In the case of a production order for a customized shape, there are additional costs for a new die-cutter.

- 20.A.OPA6M - 45,3x3 cm
- 20.B.OP79 - 40 x 5cm

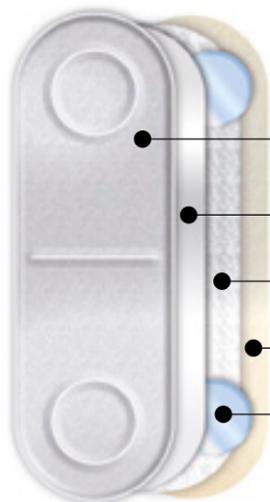

## MAGNET CLIPS

It is an excellent alternative to reflective armbands, easier to hide e.g. in a handbag. The versatility of this product is gaining more and more fans, not only in the advertising industry. It is an example of how market demand can be combined with advertising - because magnetic clips can be freely marked and produced in any shape.

Check out the printing, mounting and packaging options in the technical section of the pages: 14-22

70.A.M54X - 146 x 48,6 mm

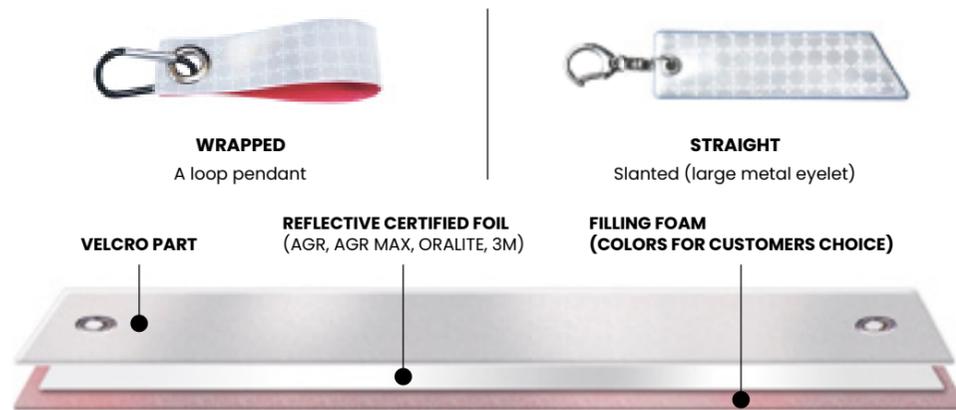

## REFLECTIVE LOOP STRAPS

Reflective Loop straps for handbags and backpacks are an idea for elegant and discreet protection of the user in the dark. The keyring is a favorite accessory for anyone who does not want the reflector to be too conspicuous but at the same time an elegant addition to their wardrobe.

**Check out the printing, mounting and packaging options in the technical section of the pages: 14-22**

### Printing method:

- **Printing on reflective foil:** 1-3 colors (silk-screen printing) or CMYK (digital printing) – the place of printing covers the reflector's surface
- **Printing under the reflective film:** on white Folprint CMYK (digital printing) – 100% retained reflective surface
- **Printing method on flocking** (certificate number, instruction of use) – screen printing 1 color

**Print area: limited only by the surface of the loop strap**

CE CE Conformity product with EU Regulation 2016/425 – PPE products.

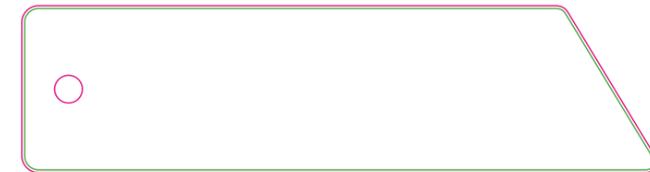

The addition of black foam filler under the silver reflective foil makes the keyring a stylish accessory that satisfies the most discerning tastes. On requirement, we offer individual packaging with the customer's mark.

40.A.R4 - 23 x 3 cm

40.A.R27 - 23 x 3 cm

40.A.R39 - 11,4 x 3 cm

40.B.R47 - 18,1 x 1,4 cm

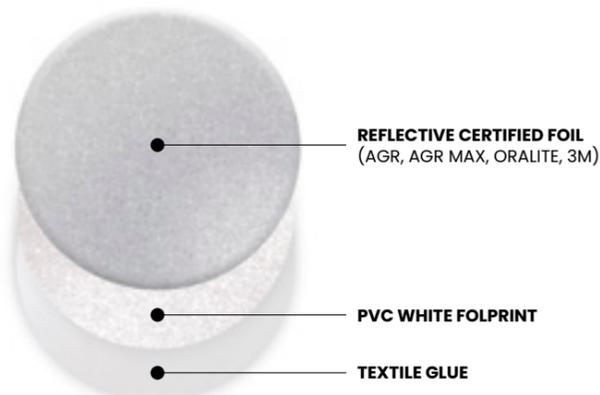

## TEXTILE REFLECTIVE STICKERS

Reflective textile stickers are a breakthrough in the reflective market – we design any shape of a sticker, also in the shape of a logo. These stickers are a simple, inexpensive, uncomplicated but effective reflective and advertising gadget in one. A novelty is a special glue we use for textiles, which keeps the reflective sticker in place and makes it resistant to washing machine. The sticker has been tested for washing: the product applied to textiles withstands 6 wash cycles at 30°C.

Check out the printing, mounting and packaging options in the technical section of the pages: 14-22

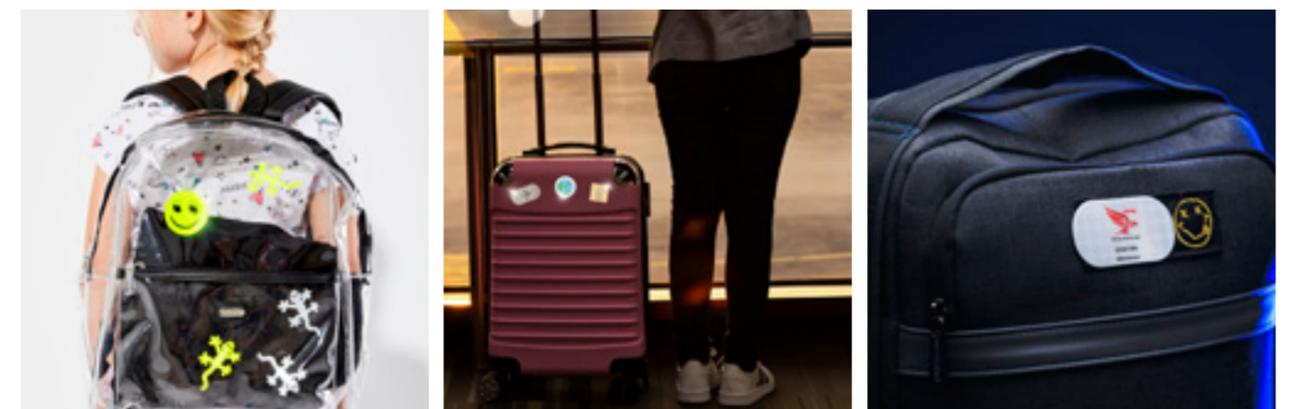

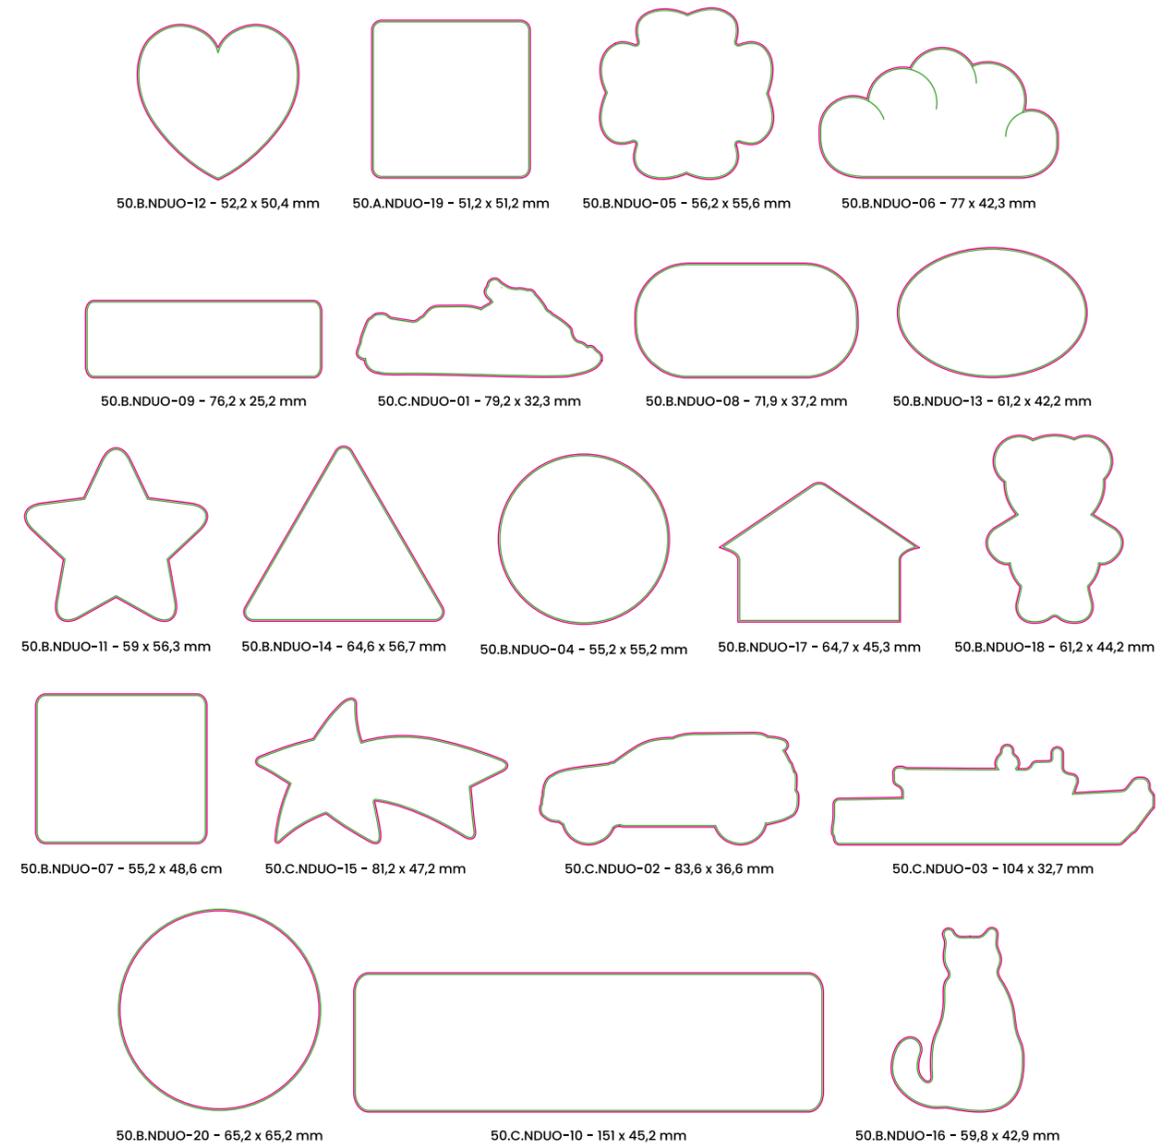

### Printing method:

- **Printing on reflective foil:** 1-3 colors (silk-screen printing) or CMYK (digital printing) – the place of printing covers the reflector's surface
- **Printing under the reflective film:** on white Folprint CMYK (digital printing) – 100% retained reflective surface

**Print area: limited only by the surface of the product**

## GIFT AWARD

Reflective textile stickers are Winner in the international prestigious competition The Promotional Gift Award 2023 in the Communicative Products category - HAPTICA Awards 2023 (Germany). This competition recognizes bold and creative concepts from manufacturers of advertising products.

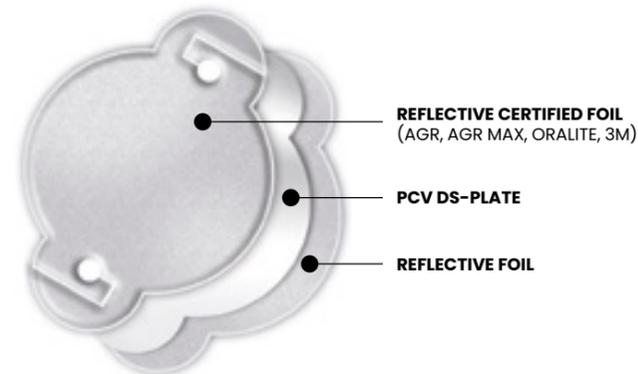

## SHOE REFLECTORS

In today's fast-paced world, safety is paramount, especially for pedestrians and cyclists navigating urban areas. Reflective shoe reflectors designed for sports shoes provide an innovative solution to increase visibility in traffic. These accessories, easily attachable to shoelaces, offer a practical and stylish way to stay safe on the road. The product is perfect for creating gift sets, either individually or in combination with other reflective items. See more in the section: Reflective Sets.

Check out the printing, mounting and packaging options in the technical section of the pages: 14-22

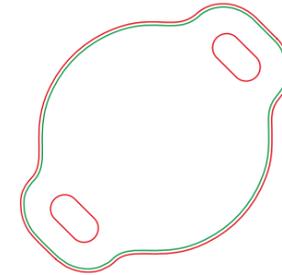

**Printing method:**

- **Printing on reflective foil or fabric silver TXR:** 1 color (pad printing), CMYK (digital printing)
- **Printing under reflective foil:** on white PVC-DS in CMYK – (reflective foil buttons only)

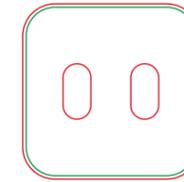

**Print area: limited only by the surface of the product**

The primary function is to enhance visibility in low-light conditions. When attached to shoelaces, the reflective surface catches and reflects light from vehicle headlights, ensuring that drivers notice the wearer from a distance. This added visibility can significantly reduce the risk of accidents, especially during early mornings, evenings, or nighttime activities.

These accessories are particularly beneficial for those who exercise outdoors, such as joggers or cyclists, and for children walking to school. By making users more visible to drivers, reflective shoe clips contribute to creating safer streets and reducing accidents in urban environments.

90.B.SH1 - 4,5 x 3,4 cm

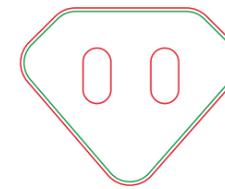

90.A.SH2 - 2,5 x 2,5 cm

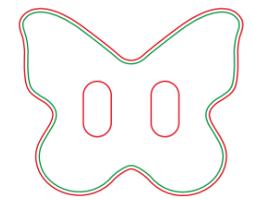

90.A.SH3 - 2,6 x 2,6 cm

90.A.SH4 - 3,1 x 2,7 cm

90.A.SH6 - 3,2 x 2,7 cm

90.A.SH7 - 3,5 x 1,46 cm

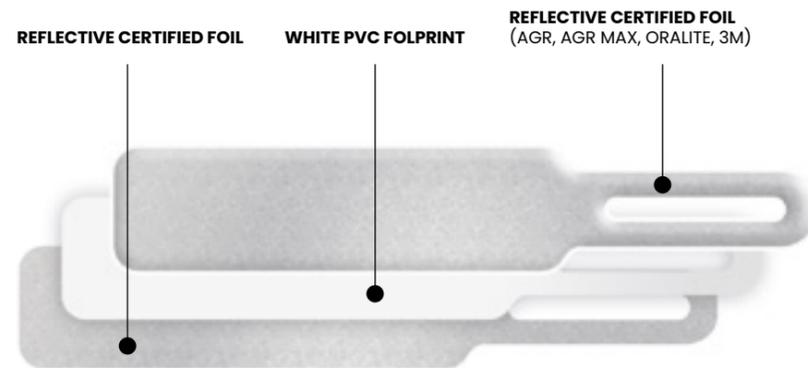

## REFLECTIVE ZIP PULLERS

A small but effective reflector attached to the zip of a jacket or sportswear that shines perfectly at night with reflected light. For best results, attach it in several places, so that the pedestrian can be seen from all sides.

Check out the printing, mounting and packaging options in the technical section of the pages: 14-22

Reflomax ENFREN Reflomax AGR MAX ORAFOL Reflomax RRP STANDARD FOIL

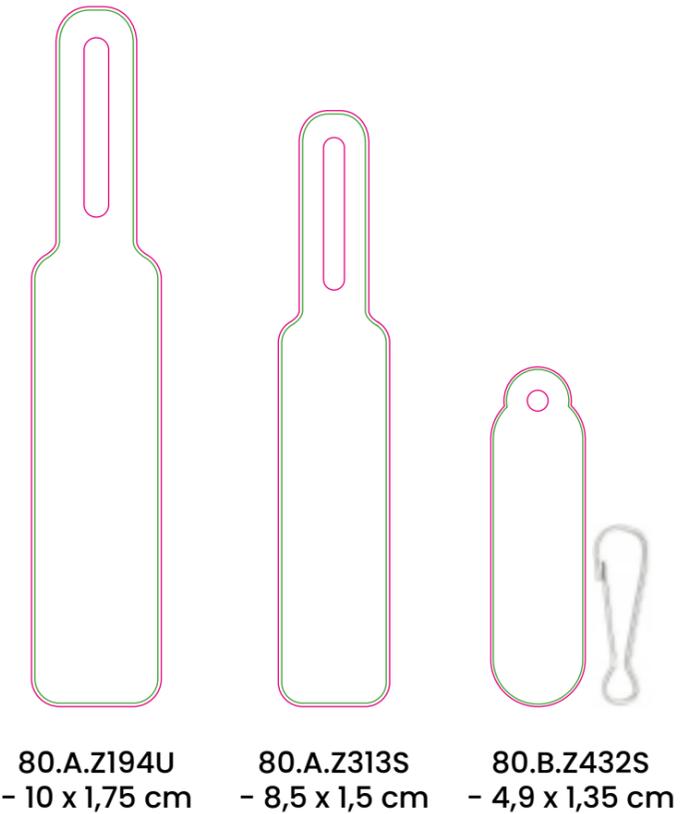

### Printing method:

- **Printing on reflective foil:** 1-3 colors (silk-screen printing) or CMYK (digital printing) – the place of printing covers the reflector's surface
- **Printing under the reflective film:** on white Folprint CMYK (digital printing) – 100% retained reflective surface

Print area: limited only by the surface of the product

Thanks to the zip fastener, a car driver will be able to spot a pedestrian or a runner more quickly. The simple assembly makes this product universal and well-liked by users and certainly places this advertising gadget in the group of things actually and willingly used. The product is perfect for creating gift sets, either individually or in combination with other reflective items. See more in the section: Reflective Sets.

\*This product, due to its small size, has no chance to meet the requirements of EN 13356 or EN 17353 regardless of the type of reflective film used – but the use of certified materials guarantees the high quality of the final product.

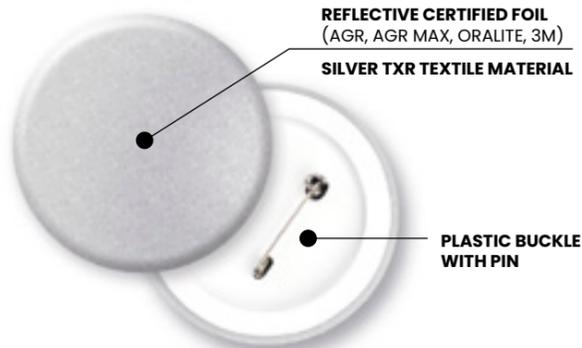

## REFLECTIVE BUTTONS

Pin badges are a popular and well-known advertising gadget, but not necessarily in a reflective version. Why not combine the advertising and protective function in one? The pin can be attached to clothing (e.g. a jacket sleeve) or a backpack.

Check out the printing, mounting and packaging options in the technical section of the pages: 14-22

**Print area: limited only by the surface of the product**

**1.** Silver TXR textile material (same as the stripes on warning waistcoats)

**2.** Certified reflective foil as an outer layer

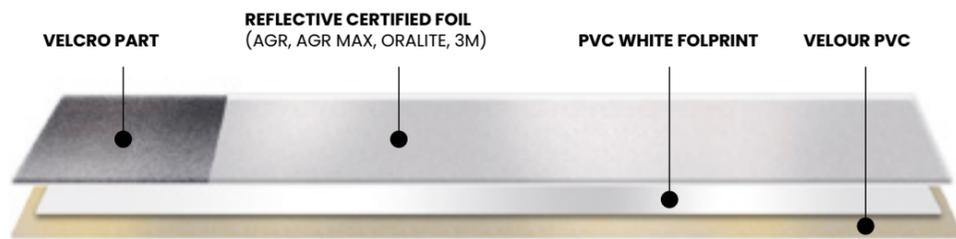

## REFLECTIVE VELCRO BANDS

The reflective velcro band is the ideal product for evening walks. When darkness falls, the reflective snap band will make the pedestrian visible to drivers. Reflective slap bands can be worn on wrists or ankles. According to the latest EN17353 standard, 2 reflective armbands must be worn in a set to product the requirements of EU Regulation 2016/425 – Protective Equipment Products.

**Check out the printing, mounting and packaging options in the technical section of the pages: 14-22**

### Printing method:

- **Printing on reflective foil:** 1-3 colors (silk-screen printing) or CMYK (digital printing) – the place of printing covers the reflector's surface
- **Printing under the reflective film:** on white Folprint CMYK (digital printing) – 100% retained reflective surface
- **Printing method on flocking** (certificate number, instruction of use) – screen printing 1 color

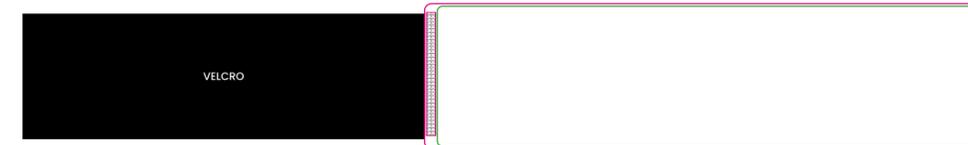

**Print area: limited only by the surface of the product**

CE CE Conformity product with EU Regulation 2016/425 – PPE products.

The product is perfect for pedestrians, runners, cyclists, and children – certified reflective rye film for production will ensure the safety of the user in traffic. The band consists of two parts: a strong, elastic Velcro strap, which allows you to adjust the band's diameter to the arm, and a reflective part made of film. This is a great solution for uniformed and security services as a reflective informational armband.

30.C.OPA12M – 440 x 75 mm

30.D.OPA1V – 500 x 58 mm

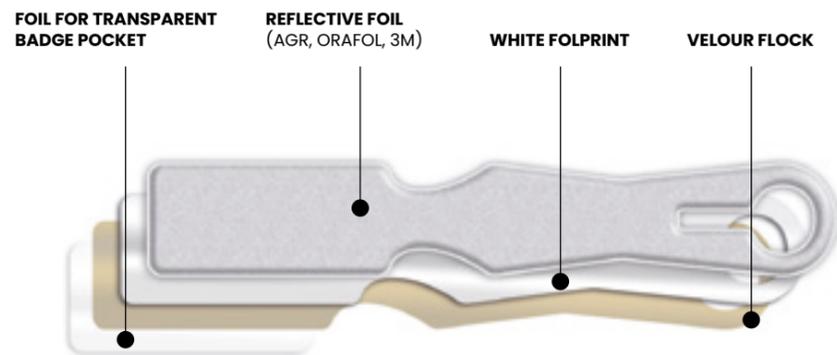

## REFLECTIVE LUGGAGE TAGS

Reflective luggage tags are easy to attach to a suitcase or travel bag. The outer layer consists of a certified reflective film and the inside is made of black PVC film, with a transparent pocket for passenger ID.

Check out the printing, mounting and packaging options in the technical section of the pages: 14-22

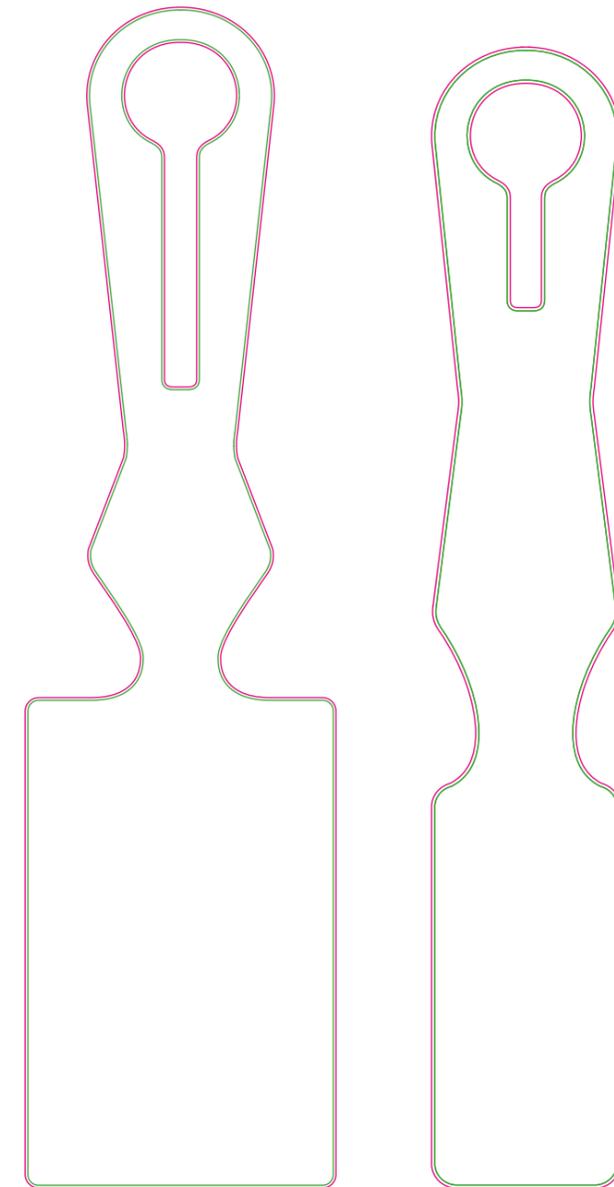

### Printing method:

- **Printing on reflective foil:** 1-3 colors (silk-screen printing) or CMYK (digital printing) – the place of printing covers the reflector's surface
- **Printing under the reflective film:** on white Folprint CMYK (digital printing) – 100% retained reflective surface

Print area: limited only by the surface of the product

The luggage tag is a useful gadget that makes your belongings visible even in the dark, and at the same time labels them.

130.B.R32 – 22,10 x 5,8 cm

130.A.R25 – 21,3 x 3,4 cm

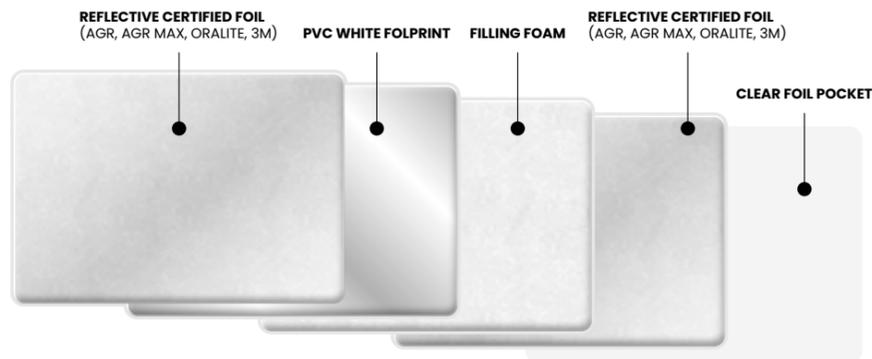

## REFLECTIVE CARD HOLDER

Introducing our innovative 2 sides reflective card holder, crafted from high-quality reflective film. This sleek and stylish accessory is designed to securely hold 1 or 2 cards, making it perfect for those on the go. Its unique material not only adds a touch of modernity but also enhances visibility in low-light conditions. Plus, the surface is customizable—whether you want your design printed on the foil or beneath it, the choice is yours. Ideal for professionals, students, or anyone looking to blend functionality with flair.

**Check out the printing, mounting and packaging options in the technical section of the pages: 14-22**

### Printing method:

- **Printing on reflective foil:** 1-3 colors (silk-screen printing) or CMYK (digital printing) – the place of printing covers the reflector's surface
- **Printing under the reflective film:** on white Folprint CMYK (digital printing) – 100% retained reflective surface

**Print area: limited only by the surface of the product**

CE CE Conformity product with EU Regulation 2016/425 – PPE products.

It can be produced with full range of our reflective films. Product eligible for EN certification provided it is made from certified foil and complies with the required reflective surface.

Back

150.A.CH1 - 10,1 x 7,1 cm

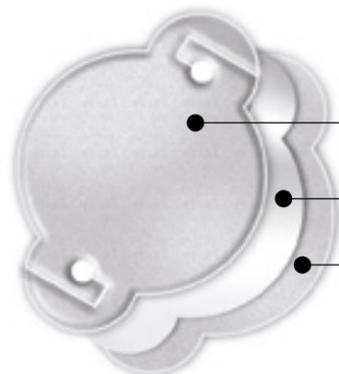

## SPOKE REFLECTORS

For the production of the reflective overlays, we use certified reflective films on both sides and a rigid DS plate in the middle. There are fixing holes on 2 ends of the cap to attach it to the bicycle spokes, so no additional fixing accessories are required. A „click“ sound lets us know that the product is securely fastened to the bike.

Check out the printing, mounting and packaging options in the technical section of the pages: 14-22

REFLECTIVE CERTIFIED FOIL  
(AGR, AGR MAX, ORALITE, 3M)

PCV DS-PLATE

REFLECTIVE FOIL

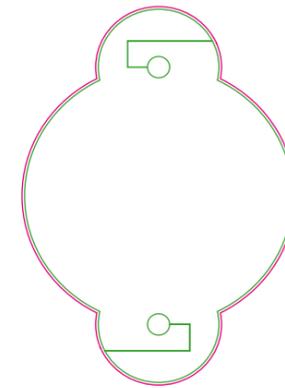

### Printing method:

- **Printing on reflective foil or fabric silver TXR:** 1 color (pad printing), CMYK (digital printing)
- **Printing under reflective foil:** on white PVC-DS in CMYK – (reflective foil buttons only)

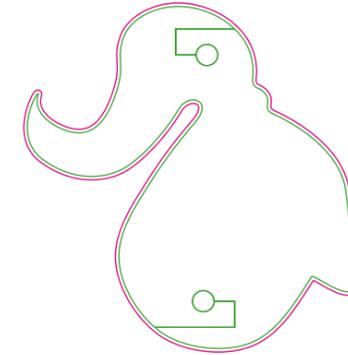

**Print area: limited only by the surface of the product**

Reflective bicycle spoke caps decorate the bicycle and provide better visibility for the cyclist in traffic after dark. When set in motion, the bicycle wheels turn into a luminous glow thanks to the reflective caps. Once fitted, the product protects you for a long time.

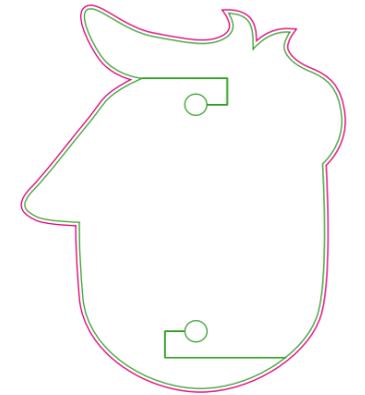

The caps are produced in standard shapes, as well as in new ones, according to customer requirements. Marking may be on the reflective film, but we strongly recommend sub-printing under the reflective film.

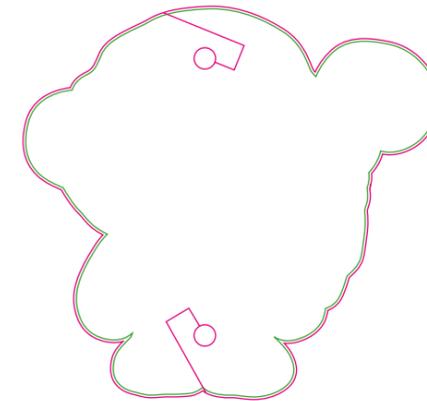

110.A.R254S – 71,2 x 51,2 mm

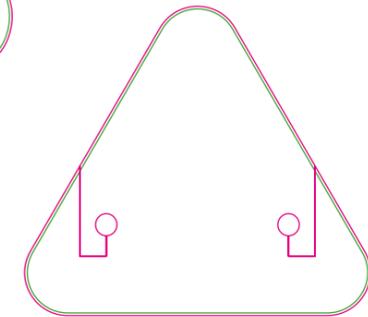

110.A.R40 – 65,6 x 62,7 mm

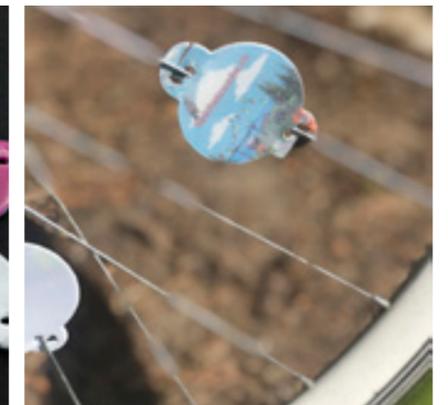

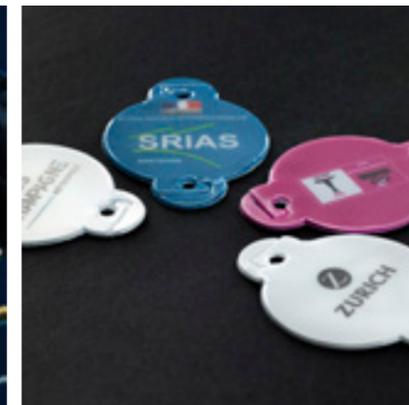

110.A.R41 – 72,7 x 60,6 mm

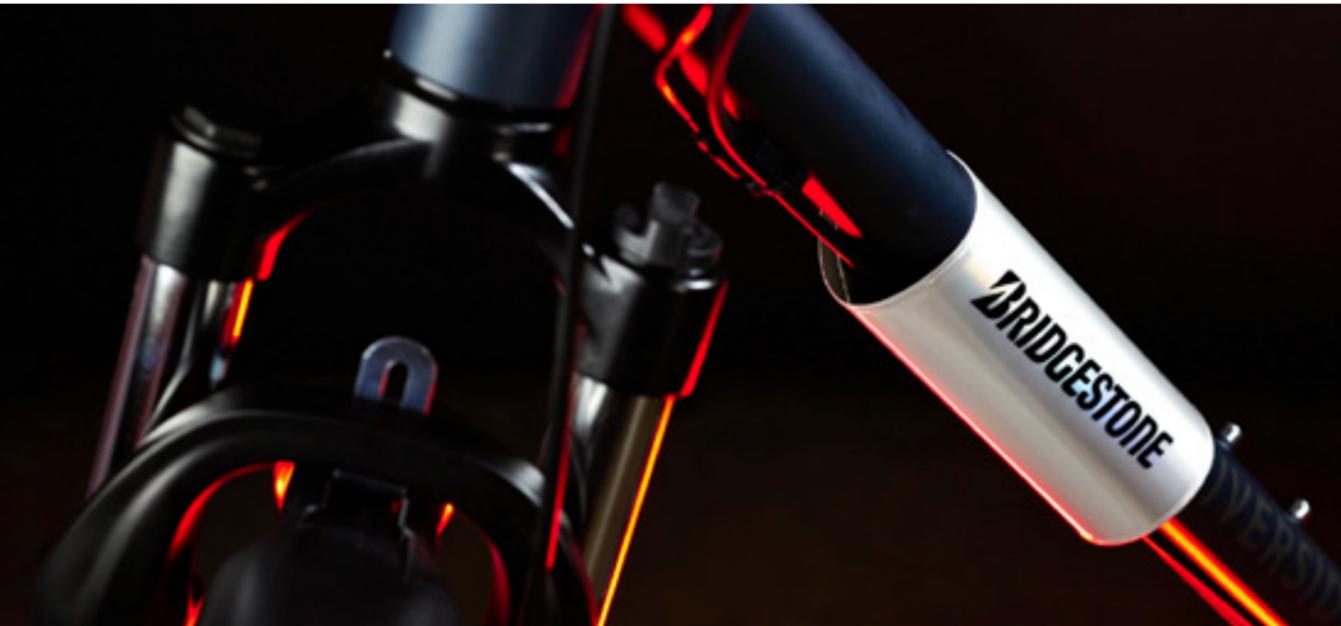

110.A.R55 – 74 x 77,8 mm

110.A.SR32SX – 64,7 x 58,2 mm

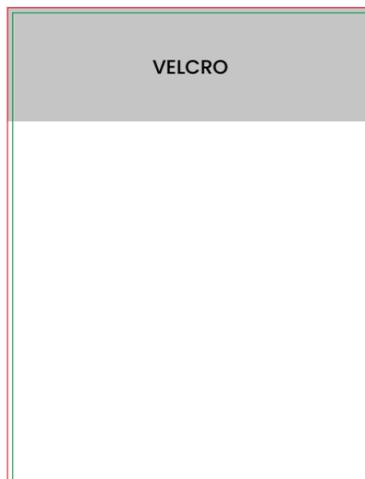

## BIKE FRAME REFLECTOR

Reflective sleeves for the bicycle frame – another idea to make the bicycle more reflective. Simply wrap the product around the bike frame and fasten it with velcro. The large reflective surface allows for discreet advertising. The product is ideal to use on scooters. The perfect visibility of the reflective bicycle frame sleeve increases your safety in traffic. The product is tested to the latest standards and is a means of personal protection.

We offer reflective bike frame reflectors in 2 sizes (depending on the bike frame dimension):

- 17,5 cm x 23 cm + Velcro part 5,5 cm + 6,5 cm – for bike frame diameter 5,5 cm
- 17,5cm x 23 cm + Velcro part 4,0 cm + 4,0 cm – for bike frame diameter 4,0 cm

**Check out the printing, mounting and packaging options in the technical section of the pages: 14-22**

120.A.R28S-1 – 23 x 17,5 cm

120.A.R28S-2 – 23 x 17,5 cm

CE CE Conformity product with EU Regulation 2016/425 – PPE products.

## BIKE PLATE REFLECTOR

Reflective bike license plate attached to bike rack or saddle offers protection against lack of visibility after dark.

**Check out the printing, mounting and packaging options in the technical section of the pages: 14-22**

140.A.BPR1 – 11 x 7 cm

### Printing method:

- **Printing on reflective foil:** 1-3 colors (silk-screen printing) or CMYK (digital printing) – the place of printing covers the reflector's surface
- **Printing under the reflective film:** on white Folprint CMYK (digital printing) – 100% retained reflective surface

**Print area: limited only by the surface of the bike plate reflector**

CE CE Conformity product with EU Regulation 2016/425 – PPE products.

CE CE Conformity product with EU Regulation 2016/425 – PPE products.

**REFLECTIVE SETS**

Reflective gift sets, made in Europe from high-quality reflective foil, visible from a distance of 300 m (the foil meets the requirements of EN 17353). The sets are mounted on environmentally friendly, FSC-certified kraft cardboard, personalized on both sides and come with instructions for use in German. They are equally useful as a promotional gift and as an accessory for increased visibility in road traffic. The sets are particularly recommended for children, joggers, cyclists and senior citizens. Once fitted, the reflector will ensure the user's safety and promote your brand for years to come. Place your trust in European quality and the perfect workmanship of the reflector with attention to detail. We offer the gift sets in four variants with different features.

Check out the printing, mounting and packaging options in the technical section of the pages: 14-22

**Printing method:**

## FREQUENTLY ASKED QUESTIONS

### What is the minimum order quantity?

The minimum quantity is 100 units for production items like wristbands, tags, magnetic clips, etc. For other items, it's 50 units. However, each order is considered individually, so we encourage contact with our sales department for specifics.

### How long does order fulfilment take?

Order fulfilment typically takes from 7 to 14 days, depending on the quantity ordered and the type of printing.

### Is the product made in Poland/Europe?

Yes, our production lines are located in Poland, as is the adjacent printing house. We are 100% independent and handle production from the design phase through printing, production, packaging, to shipping. This has a significant impact on the quality of our offered products as we control all stages of the production process ourselves. Many products are sewn by us or our subcontractors in Polish sewing factories, with Oeko-TEX certified materials sourced from trusted European suppliers.

### Can I receive samples of your products?

Certainly, after your first B2B login, we offer each interested client a standard package with free samples and a catalogue.

### Why is there a vertical line connecting the reflective films on production reflectors?

Such lines appear on all types of certified reflective films - AGR Reflomap and Oralite. The reflective beads are applied to the PVC film using large, square "stamps" on the production line, and the lines indicate the boundaries between these stamps. This is a technological process inherent to the production of reflective films and these lines are unavoidable. The same lines are also found on Chinese reflective film, which has significantly lower light reflective properties. This is a characteristic feature of the product that cannot be avoided. You would find the same explanation from any manufacturer of reflectors or reflective film, so no company can eliminate these vertical (and sometimes horizontal) lines.

**If you have any other questions please contact your salesman**

**TEXTILES  
MADE IN POLAND**

## REFLECTIVE TEXTILES MANUFACTURED IN POLAND

### Why do we manufacture reflective textiles in Poland?

#### 1. High Quality of Products

Poland has a long-standing tradition in textile production, which translates into experience and high manufacturing standards. Modern technologies and machines are used, enabling the creation of products that meet the requirements of international markets. We ensure reliable product certification conducted by European research institutes.

#### 2. Convenient Geographical Location

The central location in Europe allows for fast transportation of raw materials and finished products to other countries. The proximity to key markets, such as Germany, France, and the Czech Republic, makes textile exports cost-effective.

#### 3. Shorter Order Fulfilment Time

Local production reduces the supply chain length, enabling quick response to customer needs. This makes it possible to offer more flexible solutions, such as small batch production or product personalisation.

#### 4. Supporting the Local Economy

Textile production in Poland contributes to the development of local businesses and supports the European labour market. It strengthens the SME (small and medium-sized enterprises) sector, which is often innovative and flexible.

#### 5. Sustainable Development and Ethics

Compared to production in Asia, Polish factories often adhere to more stringent environmental and social standards. Customers increasingly value local production as a more ecological and ethical alternative.

#### 6. Skilled Workforce

Poland boasts a highly skilled workforce with experience in the textile industry, designing and manufacturing reflective clothing and accessories.

#### 7. Innovation

The Polish textile industry is rapidly developing technologies related to smart fabrics, antibacterial materials, and fire-resistant textiles, which allows for the production of modern materials with high added value.

#### 8. Local Production Culture

European consumers are increasingly appreciating locally made products, which supports domestic manufacturers and promotes economic patriotism.

#### Materials we work with:

#### 1. VEST-150GSM – Polyester Fabric Yellow

**Products :** Reflective Vest, V-Vest, String Bags  
Composition and percentage 100% Polyester, knit  
Weight 150 GSM  
Color HV Yellow
